

# OMEX Bio 20

## FUNCTION

To maximise the production of crops at risk of damage from stress conditions caused by high temperatures, soil conditions, moisture availability and disease.

OMEX Bio 20 is formulated to supply seedlings and more mature plants with essential nutrients. OMEX Bio 20 also includes organic material derived from a single seaweed variety which has proven beneficial effects upon plants by stimulating root development. Applications of OMEX Bio 20 will promote greater root biomass and therefore maximise utilisation of moisture and nutrients.

## DESCRIPTION

OMEX Bio 20 is a highly concentrated emulsion containing macro and chelated micro elements. The organic material is seaweed derived.

### TANK MIXING COMPATIBILITY

OMEX Bio 20 is compatible with most, but not all, pesticides, growth regulators and micro-nutrients with regard to physical tank mixing and biological effects on the crop. However, OMEX cannot accept any liability for any loss or damage as not all pesticides have been tested and because the efficacy of any mix will depend on, among other factors, the pesticide concerned, crop conditions, growth stage, weather and volumes of water used.

### PRECAUTIONS

OMEX Bio 20 should be stored in frost free conditions with optimum storage range between 5-40°C. OMEX Bio 20 is a non-hazardous and non-flammable foliar fertiliser. Gloves and face shield should be worn when handling the concentrate. In situations of prolonged storage there may be slight settling of the nutrient particles. This is reversible on shaking.

**PACKING:** OMEX Bio 20 is available in HDPE drums of 0.25L, 0.5L, 1L, 3L, 5L, 10L capacity. Drums are fitted with tamper evident closures. 200 and 1000 Litre mini bulk available.
